PROFESSIONAL SUMMARY

Full-stack developer experienced in building and deploying web applications using React, TypeScript, Node.js, Supabase, and PostgreSQL. Owns implementation across responsive frontend experiences, relational data modeling, serverless backend functions, authentication, third-party APIs, and cloud deployment. Strongest work includes multi-tenant access controls, payment processing, and AI-powered application workflows.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React, React Router, Tailwind CSS, TanStack Query, Zustand, responsive UI

Backend & APIs: Node.js, Express.js, REST APIs, Supabase Edge Functions (Deno), webhooks

Data & Security: PostgreSQL, Supabase, authentication, authorization, Row Level Security (RLS), database migrations, multi-tenancy

Integrations & Tools: Paystack, Gemini API, Git, GitHub, Vercel, Vite, Postman

PROFESSIONAL EXPERIENCE

Independent Full-Stack Developer 2024 – Present

- Built and deployed full-stack web applications, owning frontend implementation, backend integrations, PostgreSQL data design, and cloud deployment.
- Designed relational schemas and SQL migrations; implemented authentication, role-based access, and Row Level Security (RLS) policies for tenant-level data isolation.
- Developed Supabase Edge Functions for AI integrations, Paystack checkout initialization, server-side transaction verification, and payment webhooks.
- Built responsive React interfaces, managed application state, and troubleshot connected user-to-admin payment and balance workflows.

SELECTED PROJECTS

ChurchDue | Multi-Tenant Dues & Payment Management Platform **churchdue.vercel.app**

- Built a multi-organization platform for member/student dues, contributions, payment records, and outstanding-balance tracking using React, TanStack Query, Zustand, and Supabase.
- Implemented tenant-scoped PostgreSQL schemas and RLS policies to restrict organization data access; developed authentication and role-based admin/member workflows.
- Integrated Paystack with serverless checkout initialization, server-side payment verification, and webhook processing to synchronize payment records and balances.

SabiWrite AI | AI Writing Coach **sabiwrite-ai.vercel.app**

- Built an AI-assisted writing platform with React, Supabase, PostgreSQL, authentication, writing analytics, quizzes, and progress tracking.
- Authored 12 database schema migrations and built Deno Edge Functions for server-side quiz generation, mistake analysis, and skill-mastery workflows.
- Integrated external LLM APIs for writing assistance and implemented role-based authentication; public code: github.com/idobanj/SabiWrite-AI

EDUCATION

Federal University of Technology, Minna Nigeria

Bachelor of Engineering (in progress)
